

Finding Required by Government Code section 11125.4(c):  
Special Meeting Scheduled for December 16, 2003

The California Gambling Control Commission finds that a special meeting must be held because immediate action is required to protect the public interest. The specific facts supporting this finding are as follows:

1. The regularly scheduled meeting of December 10, 2003 was cancelled due to the illness of a Commissioner. However, the items that were on the December 10, 2003 agenda must nonetheless be acted upon. The initial applications for a work permit that were on the December 10 agenda must be processed as soon as possible so that the individual applicants can begin to work. The expiring work permit of one individual must be approved for renewal so that individual may continue to work.
2. There is a meeting scheduled in Los Angeles for December 18, 2003, but that meeting cannot be expanded to include all of the December 10, 2003 items.
3. The items on the special meeting agenda of December 16, 2003 are limited to those previously included in the ten-day notice of the December 10, 2003 meeting, except for the mandated finding of necessity for the special meeting (Government Code section 11225.4(c).)
